Why?

**The
University
of Central
Lancashire**

**Most
affordable
university
in the UK**

(The Times, 2023)

**Preston campus received a
£200 million makeover, creating a
modern and future-ready learning
environment for students.**

95.5%

of graduates enter
employment or further
study within 6 months

(Higher Education Stats
Agency 2018)

**UCLan is one of
the UK's biggest
universities with
a student and
staff community
of around
38,000.**

Why Foundation?

Foundation courses are an increasingly popular way to enter into university undergraduate degree programmes in the UK. A foundation programme offers several benefits for students, such as:

01

Providing students with a strong academic foundation which will help them succeed at university.

02

Developing essential study skills such as critical thinking, research, and analysis.

03

Increasing the chances of being accepted into a desired university programme.

04

Providing a pathway for students who are unsure about their desired career path, allowing them to explore different subjects and areas of interest.

Foundation explained

They are courses designed specifically for international students to help them attain the right level of qualifications and skills they need to succeed at UK university degree level.

Typically available as

- an intensive two or three-term/semester programme of academic subjects, study skills and English language preparation.

The Foundation courses at OnCampus UK North offer a range of proven and practical benefits for international students.

The following slides highlight 7 of them:

01

Designed for international students

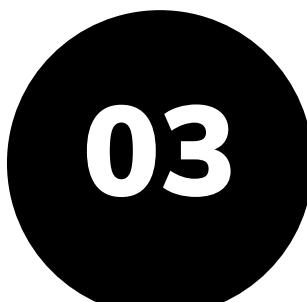

International students face unique challenges when they get to UK universities. These courses are specifically designed to address the needs of students from all over the world. They're tailored to students to ensure that they are academically ready and personally confident enough to take on and succeed at a UK university.

02

Fills any gaps in knowledge between high school and university

Education standards differ around the globe, from state to state and country to country. Teaching methods differ, the number of study hours varies, and qualifications differ too. OnCampus Foundation courses are designed to level out the differences and get all students up to standard.

03

Academic classes combined with English language

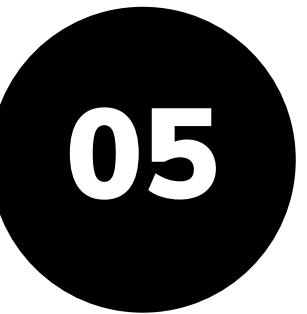

For many international students, language is the most daunting aspect of studying abroad. While your academic record may be excellent, if you aren't used to studying or speaking in English every day, or your English language qualifications aren't up to speed, you may struggle on a degree course taught in English to native English speakers. OnCampus courses can help you prepare, by providing focused training in the kind of academic English that will help you in your future degree studies.

04

Specialise in your chosen field

A foundation course tailors your studies to suit the degree programme you wish to study for in future. OnCampus UK North offers two distinct foundation programmes: the Undergraduate Foundation and the Medicine Undergraduate Foundation. They involve studying core modules common to each route, plus a set of subject-specific modules that are carefully designed to focus on the academic areas most useful to your chosen degree.

05

Get used to university-style teaching

As a graduate of a foundation course you'll have an advantage over students entering higher education straight from school. Foundation courses are taught using university-style teaching, often on-campus, with lectures, tutorials and seminar-styles classes. This all helps prepare you better for your future university studies.

06

Time to adjust

Arriving at the place you want to study, one or two years before you begin your full degree programme, gives you plenty of time to settle into everyday life, not just academic life. It means you have time to make friends, soak up those cultural differences and practical things like finding your way around town. It puts you in touch with other students who are experiencing just the same fear and excitement as you, ensuring you're on a firm foundation when you begin your degree.

07

A guaranteed university place

Once you complete your foundation course and achieve the required grades, you'll be guaranteed entry into the first year of your chosen undergraduate degree at the University of Central Lancashire.

Where... Preston

01

Location

Located in the city of Preston, students enjoy the benefits of a quieter city for study, whilst having the opportunity to travel to Manchester and Liverpool for more of a big city experience.

02

Population

A student and staff population of **over 38,000**.

03

Founded

The University of Central Lancashire (UCLan) is an international, multi-campus University that can trace its roots all the way back to 1828.

Programmes offered

Undergraduate Foundation Programme

One-year programme allowing students to progress to an undergraduate degree.

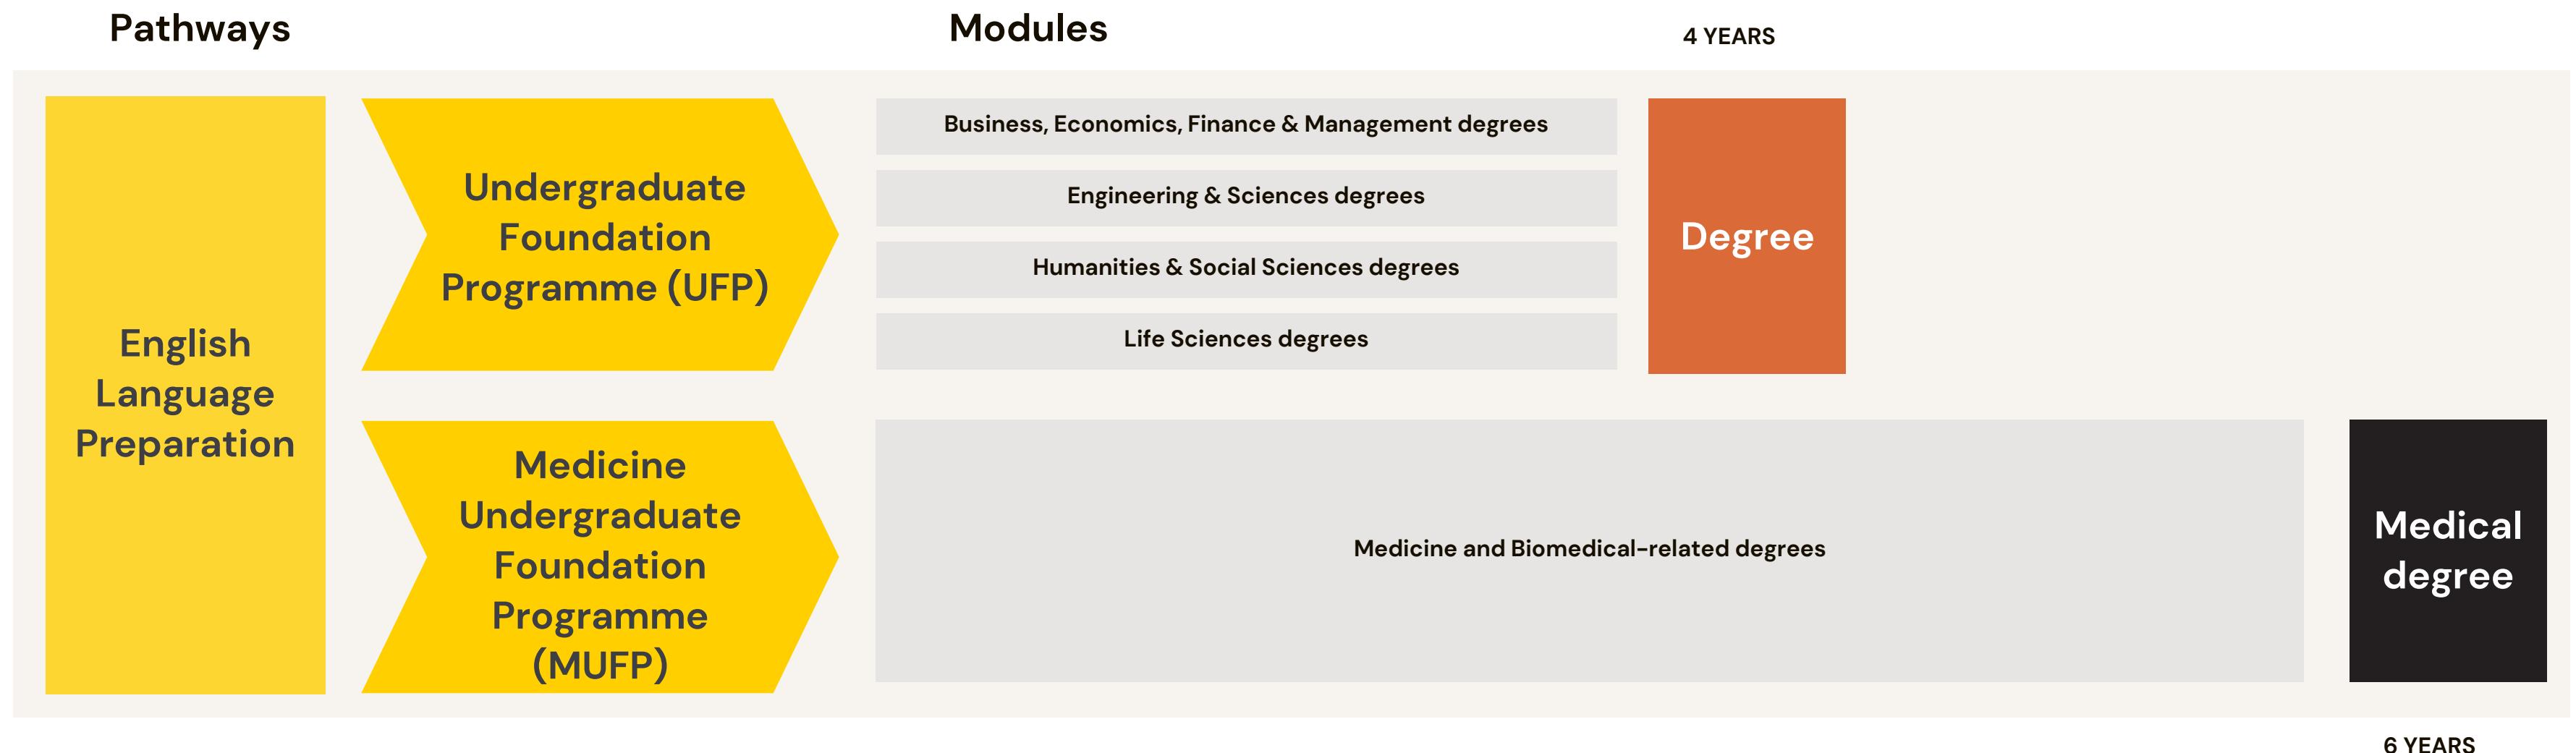

Medicine Undergraduate Foundation Programme

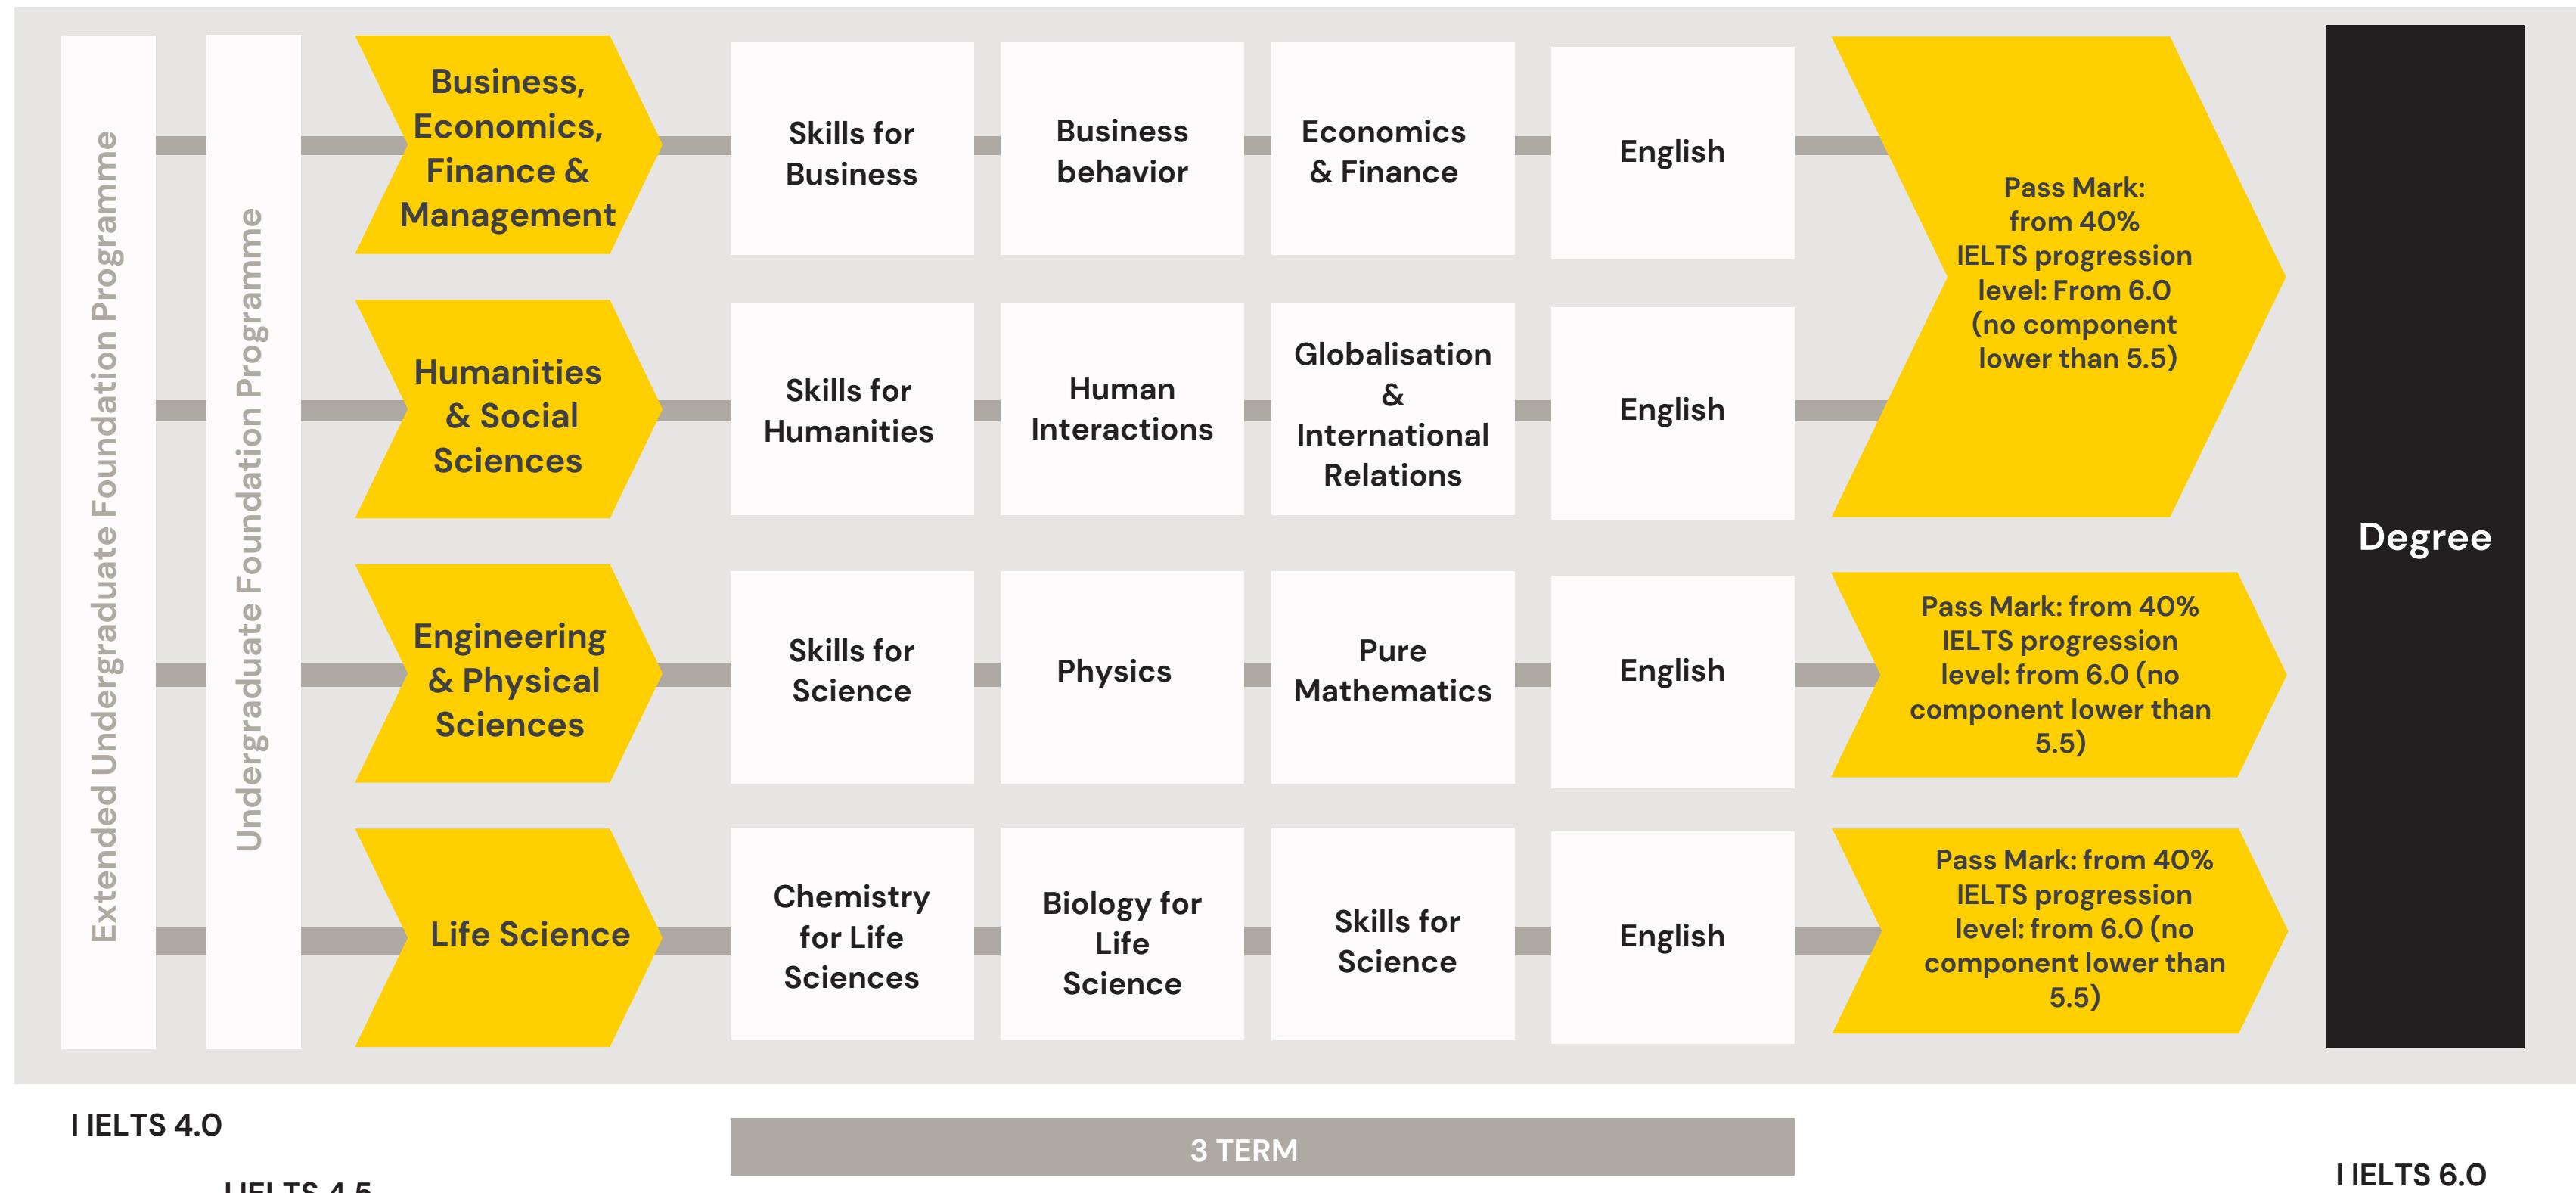

Offers students a route to Medicine and Veterinary Medicine degrees.
